

BRISBANE BOYS' COLLEGE

Brisbane Boys' College Arrowsmith Program presents

Changing Brains, Exploring a New Reality – Neuroplasticity and Learning

In this presentation Barbara Arrowsmith Young will talk about how harnessing the principles of neuroplasticity leads to changes in the brain and how each individual can create a new reality for their future. She will discuss the latest research on the Arrowsmith Program which shows changes in the brain as well as academic, emotional, social and cognitive changes.

She will describe how a learning difficulty impacts the learner in school as well as in life and that the research shows that this reality is not lifelong and can be changed. The audience will gain insight into and begin to look at behaviour through a cognitive lens. They will build an understanding that through harnessing the principles of neuroplasticity we can change the brain and overcome learning challenges.

- Date** Tuesday 3 March
- Time** 6.30pm - 8.00pm
- Venue** Brisbane Boys' College
College Hall
Kensington Terrace, Toowong
- RSVP** Book your ticket today via
